

Trattamento professionale di ogni tipo di legno.

IMPREGNANTE

Protettivo colorato per esterno che contiene pigmenti trasparenti resistenti ai raggi U.V. protegge il legno dagli agenti atmosferici e ne esalta le caratteristiche.

EFFETTO CERA

Finitura satinata incolore e colorata non sfogliante per proteggere il legno dai raggi U.V. e renderlo impermeabile all'acqua.

VERNICE

Vernice monocomponente brillante, satinata e colorata a base di pigmenti solidissimi alla luce. Mette in evidenza l'estetica dei legni pregiati.

FILM

L'innovativa vernice trasparente per legno la cui caratteristica principale è la forte elasticità che gli permette di seguire i naturali movimenti del legno senza dare origine a sfogliamenti. protezione totale ai raggi U.V.

Legno, un materiale nobile e complesso

Il legno è il più antico componente di costruzione e resta, ancora oggi, uno dei più amati e prestigiosi complementi di un ambiente che si tende a richiedere sempre più "caldo", naturale e a misura d'uomo.

Brignola offre a chi ha l'esigenza di trattare il legno dei prodotti efficaci, non aggressivi, tecnologicamente avanzati e rispettosi della natura di questo particolarissimo materiale.

Principale obiettivo di Brignola è realizzare prodotti che si adattano a ciascun tipo di legno ed alle diverse funzioni a cui è destinato.

(I colori di questo campionario possono subire con il tempo leggere variazioni ed hanno quindi valore indicativo).
